WHY ANASAZI GOLD?

**100% GENUINE
NEW MEXICO HUMATES
75 MILLION YEARS WORKING**

**ANASAZI GOLD HUMIC & FULVIC
ACID BOOSTS THE VITALITY &
ENERGY OF YOUR PLANTS**

Anasazi Gold Organics proudly offers a full range of 75 million-year-old certified organic humates and humic-rich mineral supplements and products for humans, plants, and animals.

New Mexico Humates are highly compressed, natural organic humus, formed through the biological break-down of plant life over millions of years. Crucial to life, humates restore the natural balance in soil necessary for optimal plant growth, and provide the foundation for plant resistance and strength.

Our Humates are derived from cretaceous plant matter within ancient freshwater lake beds, making our products more bio-available and loaded with powerful trace minerals and amino acids. Independent testing has shown that our pure humates contain up to 96% humic acid, ranking ours among the industry's highest.

RAW HUMATES are extracted from the earth in their purest form. They consist of a black, coal-like substance that we process into granular and fine mesh powder Humate formulations that contain essential polyphenols, hormones, ketones, natural sterols, and fatty acids, making them highly effective on anything that grows.

CHELATION is a treatment for removing toxins and heavy metals from the blood or from a life system such as a plant. Humates are considered to be "Nature's Best Chelator". This is vital because chelation will result in the activation of nutrients already in the soil and keep healthy bacteria alive. It is important in neutralizing toxicity by rendering toxins and heavy metals unreactive. It also stimulates the uptake of nutrients by all plants.

At Anasazi Gold Organics, we base our products and claims on science. Our many years of experience help us understand the needs of growers, and how our New Mexico Humates can help solve problems of drought, soil depletion, and weak root structure. Our customers in farming and agriculture realized more productive crops thanks to greater stress tolerance and improved nutrient uptake.

FULVIC ACID has always been present in plants and soils, yet only recently has it been recognized for its incredible value in energizing cell life among plants and humans.

Humates contain a significant quantity of the valuable Fulvic Acid Fraction, which has a very high energy factor and is highly biochemically active. Anasazi Gold Humic and Fulvic are particularly high in the all-important Fulvic Acid fraction, which stays in solution even in strongly acidic conditions and will bring otherwise insoluble fractions of metal micronutrients and phosphorus into the solution. This allows your plants to directly and readily absorb the minerals and nutrients while producing a healthy, hormone-like effect that has an immediate positive effect on most crops.

Today we provide those rich minerals to give your soil a concentrated source of naturally-occurring humus. Its biochemically active HUMIC ACID content and the complex process of organic complexing, along with increased microbial activity, make the minerals and trace elements necessary for growth readily available to your plants.

- Stimulate root and shoot growth and increase yield.
- Stimulate chlorophyll and sugar production.
- Increase crop quality and food value
- Improve yield stability under stressful conditions

- Increase nutrient uptake by making nutrients bio-available.
- Provide a stimulus for beneficial soil microorganisms
- Increase soil water-holding capacity and filtration

SUPERIOR QUALITY NATURAL & ORGANIC HIGH GRADE AGRICULTURAL 1/4" MESH HUMATES

ALL NATURAL ORGANIC SOIL CONDITIONER

NONPLANT FOOD INGREDIENT

Soil Amending Guaranteed Analysis

Active Ingredient: 60% Humic Acids derived from Leonardite

Total Other Ingredients (Inert): 40%

Purpose: May help in micronutrient uptake

Suggested Application: 1 - 6 cups per cubic foot of soil, 15 - 75 pounds per cubic yard, 1 - 5 tons per acre. For best results, thoroughly incorporate into soil. For more information, visit our website [anasazigoldorganics.com](http://www.anasazigoldorganics.com).

Warranty Limitations: The information contained on this label is believed to be accurate and reliable. There are no warranties that extend beyond the guaranteed analysis on the face hereof. All claims against guarantee are limited to replacement of product or refund of purchase price, or by law. The buyer and user acknowledge and assume all liability resulting from the use of this material. Timing method of application, weather, crop conditions and other factors are beyond the control of the seller. ANASAZI GOLD ORGANICS INC. DISCLAIMS ALL OTHER WARRANTIES OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED INCLUDING BUT NOT LIMITED TO THE WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. ANASAZI GOLD ORGANICS™ SUPERIOR QUALITY HIGH GRADE HUMIC ACID CONCENTRATE

ALL NATURAL - SOIL CONDITIONER
MAY HELP IN MICRONUTRIENT UPTAKE
Produced From: Fresh Water Lake Deposits
Lawns - Gardens - Plants - Trees
Potted Plants - Specialty Crops

0-0-3
GUARANTEED ANALYSIS
Potash (K2O) : 3%
Non-Plant Food Ingredients
Humic Acid : 5% Derived from Leonardite
Other Inert Ingredients 92%

1 Quart (0.94 Liter)

Made by:
ANASAZI GOLD ORGANICS INC.
P.O. Box 19781
Albuquerque, New Mexico 87119
Email: info@anasazigoldorganics.com
Website: www.anasazigoldorganics.com
Phone: 1-833-777-2466

Suggested Application: 5 ml. to 10 ml. per gallon of water during vegetative growth and 10 ml. to 15 ml. per gallon of water during flowering. For best results, apply fertilizer solution every other watering, or once each week. Soak seeds for 24 hours before planting in a 15 ml. per gallon solution. Foliar spray plants to runoff with 10 ml. per gallon of water. For more information, visit our website www.agsfo.org/fmetals.html.
